<u>Multi Crew Experience User Interface screenshots</u>
Bear in mind, that the user interface is only a tiny part of the application, and you will only interact with it a couple of times, mainly to setup your preferences. The core of the program lies in the invisible part working in the background.
The General Page, where Application Features can be enabled or disabled, and various options can be set.
If running a non-English edition of Windows or the flight simulator, you will see a couple of flags that allow you to switch the user interface language between English and any of the following languages, German, Spanish, French, Italian and Portuguese.

<img src="resources/separator.gif" width="128" height="2">

The Command page, where you can select one of the installed voices to use for crew members. Choose from 7 recorded high quality voice packs,
including English US, UK, Australian, German, and French accents.
 You can also fine tune the speech recognition engine.
<img src="resources/command.jpg" width="492" height="259">

<img src="resources/separator.gif" width="128" height="2">
The Checklist page, where you can see the different headers available. You can also select your own custom made checklist.
<img src="resources/checklist.jpg" width="492" height="259">

<img src="resources/separator.gif" width="128" height="2">

The ATC page, for selecting the options you think are better for you. Note the possibility of using a joystick button, as a push to talk button, for message transmission. So, it is time to get away fom those bad habits, of reaching out for the keyboard to interact with ATC!

<img src="resources/atc.jpg" width="492" height="258">

<img src="resources/separator.gif" width="128" height="2">
The monitor page, where you can specify the proficiency level you are seeking, and set some operational parameters.
<img src="resources/monitor.jpg" width="492" height="256">

<img src="resources/separator.gif" width="128" height="2">
The Simulator page, where you can select the different elements of the user interface to be controlled by voice.
<img src="resources/sim.jpg" width="492" height="258">

<img src="resources/separator.gif" width="128" height="2">
Finally, the About page, that just gives an overview of your hardware setup.
<img src="resources/about.jpg" width="492" height="256">

MCE can be minimized to a very narrow window, taking little screen space.
<img src="resources/mce_ui_minimized.jpg" width="498" height="23">
It's also completely hidden when the simulator is in full screen mode.
MCE ships with a variety of tools that help you accomplish things
<u>VoxKey:</u>
Voxkey is a tool that allows you to create your own voice commands

that will be converted to keyboard strokes.
It's a bit like getting a free VoiceBuddy dedicated to FSX & FS9
<img src="voxkey_main.jpg" width="498" height="257">

<img src="voxkey_edit.jpg" width="497" height="257">

<u>Speech training tool:</u>
MCE ships with a speech training tool that allows you to train your voice on custom words and sentences
<img src="tool_speech_training.JPG" width="498" height="259">

The only fully interactive, fun to use crew simulation on the market, for MSFS 2020, Prepar3D, FSX, FS9 and X-Plane using voice control.
Now fully integrated with FlyByWire
A320 mod and Aerosoft CRJ for MSFS

No complicated setup, simply download, unzip, and run Setup.exe.

<u>Hardware requirements:</u>
If your computer can run the simulator, you will be able to run MCE.
You will definitely need a Headset with noise cancelling microphone.
It doesn't need to be of the expensive variety.
A decent sound card , even onboard one.
About 1.8 GB free space on hard drive for a complete installation that
would include all voice packs.
In any case, we give you the opportunity to try it out, so you will be in a
better position to assess the package against your hardware configuration.

<img src="resources/separator.gif" width="128"
height="2">

<u>Software requirements:</u>
Depending on the desired package, you will need Microsoft Flight
Simulator
X, Prepar3D, FS2004, or X-Plane 10.
The simulator version can be English, or any non-english
distribution.
Windows 10 or Win 8 users: You can run MCE on any Windows 10 or
Win
8 edition or language. Just make sure you run Windows Update, download
and install the free English language pack.
Works on Windows 7 too.
See "Installation guide" for details.
Because it is not humanely possible to test this application on every
Windows variant available (when you include Greek, Japanese, Arabic,
Hebrew, Chinese, Korean, etc..) the software requirements as stated
above are believed to be correct, but we may have omitted other
platforms where this application will happily run. So, again, feel free

to try it out.

<img src="resources/separator.gif" width="128"
height="2">
No complicated setup, simply download, unzip, and run Setup.exe.

<u>Hardware requirements:</u>
If your computer can run the simulator, you will be able to run MCE.
You will definitely need a Headset with noise cancelling microphone.
It doesn't need to be of the expensive variety.
A decent sound card , even onboard one.
About 1.8 GB free space on hard drive for a complete installation that
would include all voice packs.
In any case, we give you the opportunity to try it out, so you will be in a
better position to assess the package against your hardware configuration.

<img src="resources/separator.gif" width="128"
height="2">

<u>Software requirements:</u>
Depending on the desired package, you will need Microsoft Flight
Simulator
X, Prepar3D, FS2004, or X-Plane 10.
The simulator version can be English, or any non-english
distribution.
Windows 10 or Win 8 users: You can run MCE on any Windows 10 or
Win
8 edition or language. Just make sure you run Windows Update, download
and install the free English language pack.
Works on Windows 7 too.
See "Installation guide" for details.
Because it is not humanely possible to test this application on every
Windows variant available (when you include Greek, Japanese, Arabic,
Hebrew, Chinese, Korean, etc..) the software requirements as stated
above are believed to be correct, but we may have omitted other
platforms where this application will happily run. So, again, feel free
to try it out.

                <p> </p>
       <p>Note that we could have done the following....</p>
       <p>Take the fastest PC around</p>
       <p>Use the most expensive headset</p>
```

Add background music to distract a bit
Take multiple shots
Edit out all the stuff that didn't go well
..... Ending up with the sort of promotional videos designed to sell a dream.
We take a different approach here. The product is in your hands, available as a TRY BEFORE YOU BUY, and the videos will just help you get familiar with voice commands. They are not designed to impress.
There will be misheard commands, repeats, mistakes, basically the sort of things you will be going through using the real product. In fact your own experience will very likely exceed the expectations on the videos.

Here are some very short HOW TO videos. If you are reluctant to read manuals, they can help you quickly grasp
the available voice commands.
<u>Just released for MSFS 2020</u>(Please be patient
while many videos are loaded)

Note that we could have done the following....
Take the fastest PC around
Use the most expensive headset
Add background music to distract a bit
Take multiple shots
Edit out all the stuff that didn't go well
..... Ending up with the sort of promotional videos designed to
sell a dream.
We take a different approach here. The product is in your hands,
available
as a TRY BEFORE YOU BUY, and the videos will just help you get familiar
with voice commands. They are not designed to impress.
There will be misheard commands, repeats, mistakes, basically the sort
of things you will be going through using the real product. In fact
your own experience will very likely exceed the expectations on the
videos.

A: Multi Crew Experience is a new add-on to the award winning, Microsoft Flight Simulator 2020, FSX, Prepar3D and FS9 software. It adds the missing elements, like crew coordination, interactive checklist reading, realistic ATC operation, call-outs and warnings against deviation from standards, as well as extras, like user interface voice control.
Q: <u>Who may benefit from this application:</u>
A: Anyone who wants to make the home flight simulation experience as real as it can get. Trainee pilots can use it as a tool to practice multi crew interaction and ATC phraseology.

One of the bad aspects of home flight simulation, is that it makes you breed bad habits, like trying to fly a B747 on your own, or looking for keyboard key strokes to interact with ATC.
For non native English speakers, this constitutes a great practice tool. If you are seeking an international career, as an airline pilot, you must interact well with other crew members, in English.
You don't need to be fluent in English though. Just need to be familiar with aviation terminology.
What better tool to boost your confidence!
Q: <u>How does it work?</u>
A: Multi Crew Experience builds on Microsoft SAPI 5® outstanding technology, that brings speech recognition, as well as speech synthesis to the windows® platform. We have choosen a modular design, that allows you to use, some, or all the features, according to your needs. This makes it easier to integrate. It will also play nicely, when used alongside other third party add-ons. It is fully multithreaded, and was designed with performance in mind.
Q: <u>Does it work with Asobo/Microsoft MSFS?</u>
A: Yes it does, in addition to Pepar3D and FSX.
Q: <u>What are the system requirements?</u>
A: The requirements are the same as those specified for running Microsoft
Flight Smulator 2020, FSX, PreparD or FS9, depending on which simulator version you use, as well as a headset with good quality microphone.

<u>Q: Does it require an English version of Windows?</u>
A: No, this application has been tested, and expected to work on almost
any language localized version of Windows 10.
For Vista or Windows 7 localized versions, like Spanish or French, you will need Vista, Windows 7 Ultimate or Enterprise, to be able to download and install the free Microsoft English language pack. The alternative
is to use a free third party tool called Vistalizator,
that would help you run MCE under any operating system and Language.
Q: <u>Do I need to be a native English speaker to use the software? </u>
A: Although it helps, the answer is no. You will be surprised to learn about the poor grasp of the English language among real world pilots around the world. Though you need to know what heading, speed, altitude, flaps...mean. We are talking 200 to 300 words overall.
Q: <u>Can I use MCE with a networked Radar Contact setup:</u>
A: Yes, but because MCE has no way of finding out if RC4 is running or indeed installed, you need to make a few changes to the mce.ini configuration file. Open the file C:\Users\your_user_name\AppData\Roaming\Multi
Crew Experience\mce.ini using Notepad. Look at the section titled [ATC], and change things to look like...

[ATC]
UseRadioNoise=1
SecondaryNeedAtcWindow=0
atc1=1
atc2=0
atc3=1
atc4=1
atc5=0
UseRadarContact=1
IgnoreRC4Registry=1
Save the file.
The next time you start MCE, it will prompt you to provide the RC4 installation network path. Please do so, and it will be saved.
In a networked scenario, you must make sure Radar contact
is started first, flight plan loaded, and "Start RC" button pressed, before attempting to start MCE.
<u>Q: Do i have to be online to use this product?</u>
A: No, this is a desktop application. Therefore you don't need an Internet
connection at all.
<u>Q: What is this "DIALOG MODE" thing?</u>
A: Whenever a flight simulator dialog box is displayed (weather dialog, aircraft dialog, etc), MCE switches to "DIALOG MODE", a state where only commands to interact with dialog boxes are enabled. You will not be able to interact with co-pilot in that mode. As soon as the dialog is closed, MCE will revert to "FLIGHT MODE". If for some reason, MCE is stuck in dialog mode, right click the user interface, then select "Force Flight Mode" option in drop down menu.
<u>Q: Does MCE interface with Radar Contact or ProFlight Emulator ATC?</u>
A: Starting from Version V2.0 you can interact with Radar Contact ATC as well as Pro Flight Emulator (PF3/PFE) ATC using speech recognition.

A: Multi Crew Experience is a new add-on to the award winning, Microsoft Flight Simulator 2020, FSX, Prepar3D and FS9 software. It adds the missing elements, like crew coordination, interactive checklist

reading, realistic ATC operation, call-outs and warnings against deviation from standards, as well as extras, like user interface voice control.
Q: <u>Who may benefit from this application:</u>
A: Anyone who wants to make the home flight simulation experience as real as it can get. Trainee pilots can use it as a tool to practice multi crew interaction and ATC phraseology.
One of the bad aspects of home flight simulation, is that it makes you breed bad habits, like trying to fly a B747 on your own, or looking for keyboard key strokes to interact with ATC.
For non native English speakers, this constitutes a great practice tool. If you are seeking an international career, as an airline pilot, you must interact well with other crew members, in English.
You don't need to be fluent in English though. Just need to be familiar with aviation terminology.
What better tool to boost your confidence!
Q: <u>How does it work?</u>
A: Multi Crew Experience builds on Microsoft SAPI 5® outstanding technology, that brings speech recognition, as well as speech synthesis to the windows® platform. We have choosen a modular design, that allows you to use, some, or all the features, according to your needs. This makes it easier to integrate. It will also play nicely, when used alongside other third party add-ons. It is fully multithreaded, and was designed with performance in mind.
Q: <u>Does it work with Asobo/Microsoft MSFS?</u>
A: Yes it does, in addition to Pepar3D and FSX.
Q: <u>What are the system requirements?</u>
A: The requirements are the same as those specified for running Microsoft
Flight Smulator 2020, FSX, PreparD or FS9, depending on which simulator version you use, as well as a headset with good quality microphone.

<u>Q: Does it require an English version of Windows?</u>
A: No, this application has been tested, and expected to work on almost
any language localized version of Windows 10.
For Vista or Windows 7 localized versions, like Spanish or French, you will need Vista, Windows 7 Ultimate or Enterprise, to be able to download and install the free Microsoft English language pack. The alternative
is to use a free third party tool called Vistalizator,
that would help you run MCE under any operating system and Language.
Q: <u>Do I need to be a native English speaker to use the software? </u>
A: Although it helps, the answer is no. You will be surprised to learn about the poor grasp of the English language among real world pilots around the world. Though you need to know what heading, speed, altitude, flaps...mean. We are talking 200 to 300 words overall.
Q: <u>Can I use MCE with a networked Radar Contact setup:</u>

A: Yes, but because MCE has no way of finding out if RC4 is running or indeed installed, you need to make a few changes to the mce.ini configuration file. Open the file C:\Users\your_user_name\AppData\Roaming\Multi Crew Experience\mce.ini using Notepad. Look at the section titled [ATC], and change things to look like...
[ATC]
UseRadioNoise=1
SecondaryNeedAtcWindow=0
atc1=1
atc2=0
atc3=1
atc4=1
atc5=0
UseRadarContact=1
IgnoreRC4Registry=1
Save the file.
The next time you start MCE, it will prompt you to provide the RC4 installation network path. Please do so, and it will be saved.
In a networked scenario, you must make sure Radar contact is started first, flight plan loaded, and "Start RC" button pressed, before attempting to start MCE.
<u>Q: Do i have to be online to use this product?</u>
A: No, this is a desktop application. Therefore you don't need an Internet connection at all.
<u>Q: What is this "DIALOG MODE" thing?</u>
A: Whenever a flight simulator dialog box is displayed (weather dialog, aircraft dialog, etc), MCE switches to "DIALOG MODE", a state where only commands to interact with dialog boxes are enabled. You will not be able to interact with co-pilot in that mode. As soon as the dialog is closed, MCE will revert to "FLIGHT MODE". If for some reason, MCE is stuck in dialog mode, right click the user interface, then select "Force Flight Mode" option in drop down menu.
<u>Q: Does MCE interface with Radar Contact or ProFlight Emulator ATC?</u>
A: Starting from Version V2.0 you can interact with Radar Contact ATC as well as Pro Flight Emulator (PF3/PFE) ATC using speech recognition.

class="content" id="content_container"> Q: <u>What is Multi Crew Experience?</u>
A: Multi Crew Experience is a new add-on to the award winning, Microsoft Flight Simulator 2020, FSX, Prepar3D and FS9 software. It adds the missing elements, like crew coordination, interactive checklist reading, realistic ATC operation, call-outs and warnings against deviation from standards, as well as extras, like user interface voice control.
Q: <u>Who may benefit from this application:</u>
A: Anyone who wants to make the home flight simulation experience as real as it can get. Trainee pilots can use it as a tool to practice multi crew interaction and ATC phraseology.
One of the bad aspects of home flight simulation, is that it makes you breed bad habits, like trying to fly a B747 on your own, or looking for keyboard key strokes to interact with ATC.
For non native English speakers, this constitutes a great practice tool. If you are seeking an international career, as an airline pilot, you must interact well with other crew members, in English.
You don't need to be fluent in English though. Just need to be familiar with aviation terminology.
What better tool to boost your confidence!
Q: <u>How does it work?</u>
A: Multi Crew Experience builds on Microsoft SAPI 5® outstanding technology, that brings speech recognition, as well as speech synthesis to the windows® platform. We have choosen a modular design, that allows you to use, some, or all the features, according to your needs. This makes it easier to integrate. It will also play nicely, when used alongside other third party add-ons. It is fully multithreaded, and was designed with performance in mind.
Q: <u>Does it work with Asobo/Microsoft MSFS?</u>
A: Yes it does, in addition to Pepar3D and FSX.
Q: <u>What are the system requirements?</u>
A: The requirements are the same as those specified for running Microsoft
Flight Smulator 2020, FSX, PreparD or FS9, depending on which simulator version you use, as well as a headset with good quality microphone.

<u>Q: Does it require an English version of Windows?</u>
A: No, this application has been tested, and expected to work on almost
any language localized version of Windows 10.
For Vista or Windows 7 localized versions, like Spanish or French, you will need Vista, Windows 7 Ultimate or Enterprise, to be able to download and install the free Microsoft English language pack. The alternative
is to use a free third party tool called Vistalizator,
that would help you run MCE under any operating system and Language.
Q: <u>Do I need to be a native English speaker to use the software? </u>

A: Although it helps, the answer is no. You will be surprised to learn about the poor grasp of the English language among real world pilots around the world. Though you need to know what heading, speed, altitude, flaps...mean. We are talking 200 to 300 words overall.
Q: <u>Can I use MCE with a networked Radar Contact setup:</u>
A: Yes, but because MCE has no way of finding out if RC4 is running or indeed installed, you need to make a few changes to the mce.ini configuration file. Open the file C:\Users\your_user_name\AppData\Roaming\Multi
Crew Experience\mce.ini using Notepad. Look at the section titled [ATC], and change things to look like...
[ATC]
UseRadioNoise=1
SecondaryNeedAtcWindow=0
atc1=1
atc2=0
atc3=1
atc4=1
atc5=0
UseRadarContact=1
IgnoreRC4Registry=1
Save the file.
The next time you start MCE, it will prompt you to provide the RC4 installation network path. Please do so, and it will be saved.
In a networked scenario, you must make sure Radar contact
is started first, flight plan loaded, and "Start RC" button
pressed, before attempting to start MCE.
<u>Q: Do i have to be online to use this product?</u>
A: No, this is a desktop application. Therefore you don't need an Internet
connection at all.
<u>Q: What is this "DIALOG MODE" thing?</u>
A: Whenever a flight simulator dialog box is displayed (weather dialog, aircraft dialog, etc), MCE switches to "DIALOG MODE", a state where only commands to interact with dialog boxes are enabled. You will not be able to interact with co-pilot in that mode. As soon as the dialog is closed, MCE will revert to "FLIGHT MODE". If for some reason, MCE is stuck in dialog mode, right click the user interface, then select "Force Flight Mode" option in drop down menu.
<u>Q: Does MCE interface with Radar Contact or ProFlight Emulator ATC?</u>
A: Starting from Version V2.0 you can interact with Radar Contact ATC as well as Pro Flight Emulator (PF3/PFE) ATC using speech recognition.
